## Experience

### Test Automation Engineer

Nov 2023 – Feb 2024 // Solvd Inc.

At Solvd LABA, I gained experience in software development using Java, Maven, and Git. I improved in Java and object-oriented programming concepts, such as exception handling, collections, and advanced techniques like thread management and database connectivity with JDBC and MyBatis. Additionally, I worked in an agile environment using Scrum and tools like Jira. I also acquired skills in test automation using TestNG, Rest Assured, Selenium, and the Carina Framework.

### Software Engineer

Feb 2024 – Present // Freelance

As a freelancer, I have used JavaScript, TypeScript, and Java, allowing me to develop custom applications and software integrations for clients. Moreover, has allowed me to gain experience in assessing requirements, managing time, and streamlining the development process.

### Back End Engineer

Apr 2024 – Present // Venedicto

At Venedicto, I have been involved in projects as a Backend Engineer, analyzing, designing, and applying architectures and scalable solutions.

## Education

### Systems Engineering

Mar 2020 – Present // Universidad Tecnológica Nacional

## Licenses & certifications

### Full Stack Web Developer

Oct 2023 // Egg

### English Certificate 62/100 (C1 Advanced)

Oct 2023 // EF SET

## Skills

### Industry Knowledge

Systems Analysis, Systems Design, Software Development, Agile & Waterfall Methodologies, Design Patterns

### Tools & Technologies

Git, JavaScript, TypeScript, Java, React.js, Next.js, Node.js, Express.js, Spring Framework, SQL, Docker, TestNG, Selenium

### Interpersonal Skills

Team Leadership, Teamwork, Analytical Skills, Problem Solving

## Languages

Español (Native)

English (C1 Advanced)
