Sebastián Fermanelli

Systems Engineering student

About

I am a Systems Engineering student with a great interest in new technologies and innovations.

In addition, I have skills in conflict management, communication, personal productivity, and teamwork. I consider myself a responsible and dedicated person to my work and my team. I am always prepared to listen and contribute ideas to improve the work environment and project results.

I also have an intermediate level of English, which allows me to communicate effectively with people from different parts of the world and stay informed about international advances in my field of study.
